

India Warehousing & Logistics Show 2011

17 - 19 November 2011, University Grounds, Ahmedabad

The Complete Supply Chain Event of Western India

Concurrent Shows:

Ahmedabad: India Warehousing & Logistics Show 2011, an International exhibition & conference is going to take place from 17-19 November 2011 at University Grounds, Ahmedabad, Gujarat, India in concurrence with India Material Handling & logistics show 2011 and India Cold Storage Show 2011. The show is most suitable for catering supply chain and logistics along with material handling and cold storage needs of user industries. A two-day technical conference will focus on latest developments of the supply chain sector will also be concurrently organized with the show. Three-day trade show backed with concurrent industry conference makes it a must to attend event.

India Warehousing Show 2011, which took place in April this year, welcomed around 6700 trade visitors including some well-known decision makers from various industries. The concurrent conference on the theme of *“Developing Effective Strategies to Build Profitability in Warehousing and Supply Chain Logistics Operations”* was concurrently organized with the event and was well attended by around 210 delegates from different industry sectors.

Encouraged by its success, the organisers launched India Warehousing & Logistics Show 2011 which will focus majorly on the western India’s logistics and supply chain industries. As Gujarat is emerging, as one of the fastest growing industrial states with 26 districts in the land area of 1.96 lakh sq. km. Ahmedabad today is the fastest developing city of Gujarat, this makes it an ideal venue for our show.

Gujarat has the longest coastal line of 1600 km hosting 1 major port and 40 non-major ports like Kandla, Mandvi, Pipavav, Navlakhi, and Magdallah and others. *“The pace at which the development in western India has taken place recently is remarkable,”* said Anuj Mathur, organiser of IWLS 2011.

IWLS 2011 will be the perfect market place for the user industry and will focus on warehousing, material-handling, cold storage, transportation, logistics and supply chain sector. A concurrent conference on the theme of **“Developing new markets, developing new strategies to build a successful supply chain business”** will also take place during the three-day event.

“The show will prove beneficial to users of the Material Handling, Logistics and Supply chain technology.” concluded Mathur.
